

Signature Properties -- pdf.js test corpus

=====

This PDF is part of the manual-test corpus for the Signature Properties UI. The text below describes what the toolbar button and the doorhanger should look like when this file is opened in a Firefox build with `security.pdf_signature_verification.enable_test_trust_anchors` set to true.

Expected verification state: VERIFIED

Toolbar icon: GREEN circle with white check.

Banner: GREEN. "Document signed and verified".

Status row: GREEN check, "Status: Signature verified".

Certificate row: GREEN check, "Certificate: Trusted (pdf-sign-ca)".

(Green only because this is the top-level card AND every signature in the document is verified.)

"View certificate" link below the timestamp opens `about:certificate`.

No sub-signatures.
